Prep Sheet for Bed Bug Chemical Treatment

This service will include a multi-layered approach to control, including residual chemical treatments, dusting of electrical outlets, cracks and crevices, vacuuming and steaming of mattresses, box springs and couches etc. Proper preparation is important and is required, so your technicians can access all the areas they need to quickly eradicate your problem.

- All clothing, linens and textiles that are easily washed or dry cleaned must be washed or dry cleaned and stored in sealed plastic bags. Double bagging is advised as small rips can lead to big problems. Textiles include drapes and fabric wall hangings.
- All untreatable articles such as alarm clocks, lamps, collectables and décor must be stored in sealed bags. This uncluttering of the environment will help the process and lead to more effective treatment.
- While preparing, remember that closets and shelving will need to be treated. All electronics will need to be unplugged to give the technician access to the switch plates for dusting.
- In some cases, heavily infested furniture, appliances or other articles may have to be thrown out.
- All people and pets will need to be out of the house during the treatment and then for a period of 4-6 hours after the treatment is completed as well for air out time. If you have respiratory issues, are pregnant or have children under a year old, you must be stay out a minimum of 24 hours.
- If you have pets that cannot be moved, such as fish, their tanks should be covered and aerators and filters turned off.

This service will take 2.5 to 4.5 hours to complete on a standard house. The follow up service must be booked 10-14 days from the initial service. This is designed to break the life cycle.

High quality mattress and box spring encasements are recommended to prevent future infestation.

Proper preparation is crucial for the control of bedbugs. Please have all preparations completed prior to the arrival of your technicians.

With your help, our team of technicians will be able to rid you of these nasty pests.

Thank You for choosing GT Pest Control!
